

SCIENCE/STEM IN SCHOOLS 2023 LIVE!

GLOBAL GAMBLE

A Climate-Change Comedy

perform!
EDUCATION

Celebrate Science/STEM in Schools 2023

Program Overview

GLOBAL GAMBLE! is an in-school educational program that combines high energy sketch comedy with improvisation to entertain and educate students through a fun and interactive experience. The program focuses on four key science-based messages encouraging **sustainable consumption, energy efficiency, and conservation - with a core focus on STEM and green careers.**

Students learn about energy, climate change and global warming through four fact filled sketches. Throughout, audience members and student volunteers are encouraged to offer suggestions that the actors will incorporate into the action. The result is that students have input into the show while watching it!

- The effects of energy use on our planet
- Ways to reduce your carbon footprint
- The results of climate change and the need for community resilience
- The importance of STEM education and the future of green careers

"A great show that was in depth and was a lead on to further opportunities for learning. Thank you!"

- Belfast School, Belfast 2022

"This was a really clever way to get across a lot of important information in a way that was interesting and engaging."

- Sumner School, Christchurch 2022

"Great performance, linking a great issue!"

- Swannanoa School, Swannanoa, 2022

"The students loved the interactive nature of the performance. It was engaging. Audience inspired to engage in topics that they might not normally find interesting."

- Saint Kentigern College, Auckland 2021

"Thank you for coming in. It was a great, creative kick start to our learning about food sustainability."

- Mt Pleasant/Te kura o Paeraki, Christchurch 2022
