

# SCIENCE WEEK IN SCHOOLS VIRTUAL INCURSION 2020

Celebrate the National Science Week 2020 Schools Theme: 'Deep Blue: innovations for the future of our oceans'

## Live-On-Film Performance

**Captured Live-on-Film** our *Science Week in Schools Virtual Incursion* is educational and interactive for both students and teachers to be engaged throughout. The performance is captured live-on-film with multi-cameras and in high definition, meaning everyone watching will be doing so from the best seat in the house.

A unique learning experience, when your students watch the live-in-film performance they are absorbed in real 'live theatre', with interactive components for students to answer questions and be captivated by the sketch comedy with fun scientific facts! Hosting a *Perform Education Virtual Incursion* means your whole school can be involved whether having a large group viewing, classroom by classroom sessions, or even with individual students included from home.

## Interactive Q&A

For further learning and student interaction there will be a post-performance Q&A which will provide your students with the opportunity to explore some of the key questions connected to the learning points. Additionally, there will be an opportunity for your students to ask questions online with our actors and creative team.

## Program Overview

The oceans are needlessly being harmed on a daily basis. In today's ever-changing world, those tasked with conserving our planet's resources are members of an elite squad: **The Marine Team**. This educational incursion engages grade 5-9 school students in marine science and innovation to achieve long-term sustainability of our oceans.

**The Marine Team** is a 45 minute, live-on-film sketch comedy that consists of two professional actor/educators with two goals.

The first goal is to highlight **what is ocean sustainability, how oceans impact our planet, solutions that generate healthy oceans** and **how YOU can help embrace innovative ocean technology**. The second goal is to make your students laugh so hard that they forget they're learning!

## Digital Resources

With your own individual school login, the live-on-film performance will be available for your **whole school** to watch on the date of your scheduled incursion.

The *Virtual Incursion* program package will also include a range of hands-on educational tools with online interactive games, classroom and home-based activities, and teacher resources as a tool to extend the learning. These tools are available to access for the rest of the school year to provide continued learning at school or at home.

## Quick Information

### Virtual Incursion Dates - Term 3:

Available to schedule from Mon 10th Aug  
National Science Week 2020: Mon 17th Aug  
- Fri 21st Aug

### Duration:

45 minute session made up of

- 40 minute viewing time
- 5 minute post performance Q&A

### Meet the Actors & Writer:

Schedule a separate live-stream session for your school Q&A

### Suitability:

Grades 5-9
